

Cravens is a conceptual artist working in an interdisciplinary method. She takes a wide range of approaches in her practice as a response to her autobiographical narrative. Cravens works primarily with photography, making unique pieces from an infinitely reproducible medium. Through meticulous physical distortions and transdisciplinary techniques, she creates artworks that address identity and form. Each piece ranges from large-scale installations to delicate one of a kind objects. Linking the physicality of each artwork to the concepts and themes behind the piece.
